PROFESSIONAL SUMMARY

I'm a goal oriented individual with an attention to detail, seeking an entry level position as an IT Analyst in Security, QA, or SOC. I would be willing to relocate anywhere on the east coast, with a preference for Virginia. I would be willing to consider other locations with some negotiation. My experience includes familiarity with AWS, Local VM setup, Putty and security tools such as Nessus and Splunk. Possess the ability to read and understand system data including but not limited to security event logs, system logs, proxy and firewall logs. I also have a working knowledge of scripting using Bash and have worked both in Linux and Windows environments. I am an innovative and analytical problem solver who is quick to learn.

EDUCATION

University of Pittsburgh, Main Campus- *B.S. in Psychology*
- Graduation: April 2018 – Major GPA: 3.1
  - The overlap of social psychology and cyber security is prominent. My background in psychology helps drive personal projects with an emphasis on individual needs and collaboration.
